KABILESH J

Chennai, Tamil Nadu

9566005319 kabileshsurender@gmail.com linkedin.com/in/kabilesh-j github.com/kabilesh-coder

Professional Summary

Entry-level Data Scientist with hands-on experience in building and evaluating machine learning models for regression and classification problems. Skilled in Python, SQL, Scikit-learn, and XGBoost, Certified Data Scientist, with strong foundation in data preprocessing, feature engineering, and cross-validation. Passionate about deriving insights from data and seeking opportunities in Data Science and Data Analytics roles. portfolio.com

Education

Dr. M.G.R Educational and Research Institute — **Chennai, Tamil Nadu**
Master of Business Administration (MBA - General) — *2023 – 2025*

Agurchand Manmull Jain College — **Chennai, Tamil Nadu**
Bachelor of Commerce (B.Com - Bank Management) — *2020 – 2023*

Experience

Rubixe — **Bangalore (Remote)**
Data Science Consultant Intern — *Aug 2025 – Feb 2026*

- Worked on proof-of-concept data science projects using machine learning techniques.
- Performed data preprocessing, feature engineering, model development and evaluation.
- Collaborated on client-oriented tasks to solve real-world business problems.

Projects

House Price Prediction | Python, Scikit-learn, XGBoost — **2026**

- Developed and compared multiple regression models (Linear Regression, Decision Tree, Random Forest, XGBoost) to optimize predictive performance.
- Performed data preprocessing, feature engineering, and 5-fold cross-validation.
- Achieved R^2 score of 0.98 with reduced RMSE and MAE after hyperparameter tuning.
- **Live Demo:** View App — **GitHub:** Repository

Earthquake Damage Prediction | Python, Machine Learning — **2026**

- Developed a machine learning model to classify building damage severity after earthquakes.
- Applied feature selection, hyperparameter tuning, and cross-validation.

Home Loan Default Prediction | Python, Machine Learning — **2026**

- Developed classification models to predict loan default risk.
- Handled missing values, encoding, scaling, and model evaluation using ROC-AUC.

Telecom Customer Churn Prediction | Python, Scikit-learn, XGBoost — **2026**

- Built classification models to predict customer churn using Logistic Regression, Random Forest, and tuned XGBoost.
- Handled data preprocessing, feature engineering, SMOTE for class imbalance, and cross-validation.

Employee Performance Prediction | Python, Scikit-learn, XGBoost — **2026**

- Developed classification models to predict employee performance using real-world HR dataset.
- Applied preprocessing, feature engineering, SMOTE and model evaluation techniques.

Technical Skills

Languages: Python, SQL
Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, XGBoost
Machine Learning: Regression, Classification, Cross-Validation, Feature Engineering, Model Evaluation, Hyperparameter Tuning
Tools: Jupyter Notebook, VS Code, Git, GitHub
Concepts: EDA, Cross-Validation, ROC-AUC, Precision, Recall, F1-Score
